

AGRETO Modernization kit for vehicle scales

Applications:

- Kit for upgrading a mechanical vehicle scale with PC control and evaluation software, large display and image processing

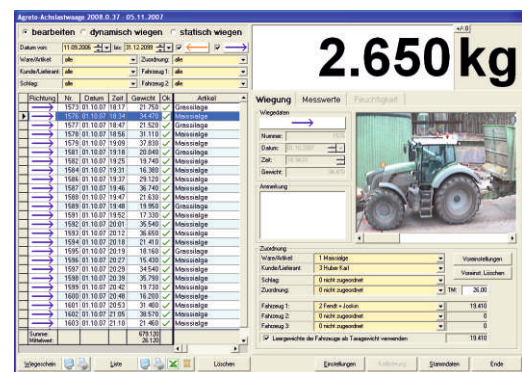

Weighing technology:

- S-type load cell and mounting hardware for the installation in the pull-rod of the scale
- Weighing indicator with PC interface for data collection and weight display

PC Software:

- Control of components and accessories
- Master data management
- Recording of measurements
- 3 weighing modes: dynamic, static, manual
- Creating weighing notes and lists
- Integrated report designer
- Data export to Excel and other formats

Benefits:

- Combines modern technology with an existing mechanical vehicle scale
- Weighing from driver's seat with radio remote control
- Low installation cost
- Scale remains mechanically ready for use

Optional Accessories:

- Large LED Display for outdoor use
- Radio remote control
- Image processing
- Traffic light signaling
